

# Skyhigh DSPM

Proactive Security for Modern Data Needs

## Complete Data Security Across Cloud and SaaS

Access controls and threat protection keep the bad guys out, but do you really know what sensitive data is sitting inside your cloud, waiting for the next misstep? Skyhigh DSPM shows you before it's too late. And what's more, it doesn't stop at data-at-rest, it also uncovers data-in-motion, across your environment.

## Proactive AI Risk Management

Blocking risky access isn't enough, especially with AI in the mix. You need to know where your sensitive data is, apply risk-based entitlements, and stop it from flowing into AI tools. Skyhigh DSPM powers your CASB and SSE with that context, helping reduce AI-related risks before they become breaches.

## Streamlined Compliance and Audit Readiness

You may already be compliant, but why not cut audit effort in half? Skyhigh DSPM automates regulatory mapping for all your cloud and SaaS data, keeping compliance evidence centralized alongside your security controls.

## Unified Security and Data Governance

No silos, no gaps, Skyhigh DSPM works seamlessly with your CASB and SSE policies to enforce data protection across all cloud platforms from a single pane of glass, delivering comprehensive security across every SSE vector to keep your data protected everywhere.

## Accelerated ROI and Operational Efficiency

Maximize your existing security stack, Skyhigh DSPM will turn your dashboards into proactive data risk control.

### NEWSFLASH

You already have access to Skyhigh DSPM today. Find out how you can derive more value from your entitlement.
