

Simplifying Global Compliance with Skyhigh DSPM

What is compliance and why it matters?

Every continent, every country, and every vertical has regulations to protect sensitive data, like DPDPA, APPI, GDPR, HIPAA, CCPA, PCI-DSS and many more.

CHALLENGES WITH COMPLIANCE

- Ever-shifting global compliance rules
- Hidden data, compliance at risk
- Manual audits, risking costly penalties
- Territory rules collide, compliance drifts
- No real-time oversight equals high-risk

What regulators need?

Protect personal data everywhere, always

Data Privacy and Protection

Log everything, continuous compliance adherence

Real-time Audit Trails

Authorize access, protect sensitive data

Access Control and Identity Management

Continuously assess and mitigate risks

Risk Assessment and Continuous Monitoring

Report incidents, act without delay

Reporting and Incident Response

What compliance officers need?

Compliance Edge
Stay ahead of global compliance rules

Audit Readiness
Effortless records, audit-ready always

Tech Harmony
Seamless tech, zero integration hassle

Access Assurance
Stay secure across all access points

Proactive Protection
Score controls, prioritize high-impact remediation

Skyhigh DSPM

Real-time Monitoring

Detect non-compliant exposures instantly.

End-to-end Traceability

Link regulations to technical controls and remediation actions.

Standards-mapped reporting

Align automatically with GDPR, HIPAA, PCI DSS, and internal frameworks.

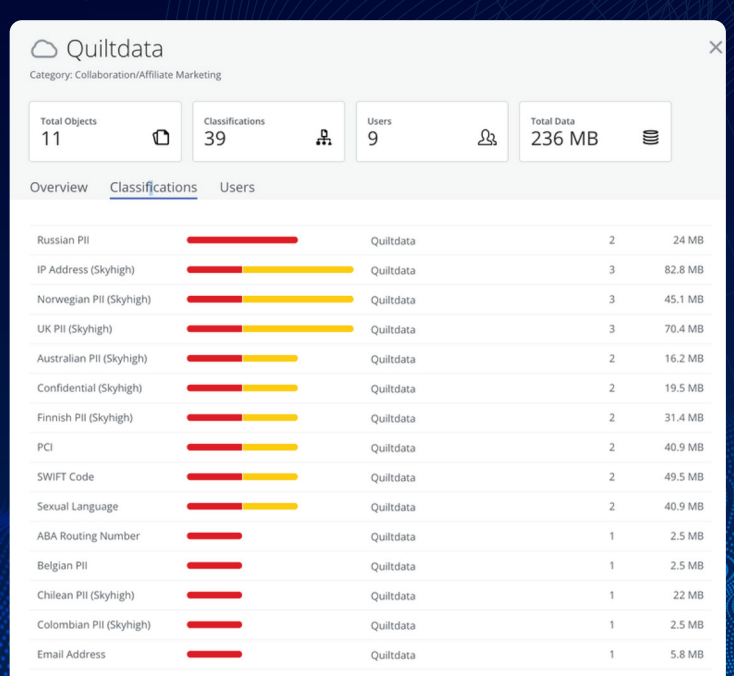

Immutable Audit Trails

Generate evidence-grade reports for regulated data.

Control Risk Focus

Prioritize high-impact remediation to focus resources where they matter most.

Skyhigh Data Explorer - Dashboard view
